

Bootstrapping revisited

Discussant: Jan Ljungberg
Department of Applied IT
Gothenburg University

Research question and aim

- ”we introduce bootstrapping as an analytical lens on different implementation strategies”

Method

- Your role in the process?
- Did the informants use the concept “bootstrapping”?
- “...what they were striving for; an organizational bootstrapper.” (last sentence discussion)

What is this a case about?

- Is bootstrapping really revisited?
- Is the blackbox really opened?
- Scalability/generalisability?

Thank you!
